

Accabonac Preserve

In January 1998, the Trust purchased four parcels totaling 92.9 acres from the Potter family, between Accabonac and Springs-Fireplace Roads in Amagansett. Funding for this acquisition was provided by an anonymous donor. The wooded property is located in the aquifer overlay district, and had a development potential of 37 homes. A 7.2-acre portion of the property is subject to restrictions held by the Town of East Hampton. The Preserve is in close proximity to other Town-protected properties and Trust Preserves. Several miles of trails run through the property as well as adjacent Town parcels. After acquisition, the Trust was given a small house that was moved to the property to provide housing for our Quail Hill Farm apprentices and/or staff.

Enjoy:

- hiking, biking, horseback riding
- walking pets on leashes
- birdwatching, photography
- plant identification, nature study

Please No:

- hunting, camping, fires
- motorized vehicles
- removal of plants, littering

Keep your eyes open for the following species, all of whom may be spotted here at the Accabonac Preserve!

Cardinal

Blue Jay

Baltimore Oriole
